

Toilet Paper Tube Stamping

What You'll Need:

- Toilet paper tubes
- Paint (tempera)
- Paper

First, put some paint onto a plate or into a bowl - something that will easily fit the toilet paper tube.

Second, have your child use the toilet paper tubes to stamp all over the paper by first dipping the tube into the paint and then pressing the tube onto the paper.

To extend this activity, try shaping the tubes into simple shapes (triangle, square, heart, rectangle) - you may need to use a little tape so that the tube holds its new shape.
