

Construction Paper Sculpture

What You'll Need:

- Construction paper (in different colors)
- Scissors
- Glue (glue stick or elmer's glue)

First, help your child cut construction paper into strips. Or you can pre-cut the strips before starting.

Second, have your child fold, twist, or bend the strips of paper in order to create a 3D paper sculpture on their paper. Folding the strip like an accordion or twisting it around a pencil are some ways to turn your paper strips into 3D art.

Third, have your child use glue to attach the strips to their paper in creative ways in order to create their own paper sculpture!
