

Torn Paper Collage

What You'll Need:

- Paper (in different colors if you have it)
- Glue (glue stick, elmer's with a q-tip, etc.)

First, show your child how to use their fingers and hands to hold the paper and tear it into pieces (it might help to have the paper in thin strips to make it easier for them to tear it into small pieces).

Second, have your child use the torn pieces of paper to create a picture or just glue the pieces however they like! You can also draw an outline of a simple picture for them to fill in with torn pieces of paper.
